DETAILED ACTION

Drawings

1. Figure 6 should be designated by a legend such as –Prior Art– because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled “ Replacement Sheet” in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5,8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Kondo et al(US 5,025,230)

The reference to Kondo et al discloses a semiconductor device, see abstract and figure 1, with an external crystal oscillator (Xtal) installed outside. An inverting amplifier(IV1) is shown in parallel to Xtal, and comprises transistors with gate insulated film(see col. 10).

A buffer circuit with similar insulated gate transistors is shown(IV2,see col. 1, line 50 and see col. 10) is used for oscillation output to to other circuits. N-channel and P-channel transistors are used and the transmission gate(TR)

shown also uses insulated gate type transistors(see abstract) and this device serves as the feedback resistor(see col. 6, lines 10-15) and is thus " ON" all the time during oscillation operation.

Allowable Subject Matter

4. Claims 6,7, and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The examiner could not find fair suggestion for the external feedback resistance, series resistor and inverting amp, and second resistor...
